**RE: Docket # 2005-385-E**

Dear Sir,

I would like to urge the Public Service Commission to encourage South Carolinians to adopt solar energy as a clean and renewable alternative to oil and coal. To this end, allowing "net metering" in our state would be a strong incentive. Naturally, electric utility companies will put up roadblocks but if other states can work out these details successfully then we can do it too. My home is in full sun and I have investigated solar in the past but the economics were hard to justify. With current tax credits and net metering, solar becomes a viable option. It doesn't make sense for us to continue pretending that the "oil crisis" will go away.

Thank you in advance for your consideration.

Sincerely,

A handwritten signature in cursive script, appearing to read "Harry Davis".

Harry L. Davis, III, DDS
